

WELCOME HOME BIRDS

WE BELIEVE THAT BRINGING NATURE BACK CLOSE TO OUR HOMES – IN THE CITY, SUBURBS OR THE COUNTRYSIDE – MAKES OUR LIVES RICHER. FEEDING AND NURTURING WILD BIRDS IN A RESPONSIBLE WAY, KEEPS THEM FIT AND HAPPY ALL YEAR THROUGH. IN TURN, THEY WILL LOVE TO KEEP YOU COMPANY.

FEED WELL - LIVE BETTER

Birds are much like us. Depending on their life stage, adapted and balanced nutrition is needed. However, they are fully exposed to the varying seasons and the available nutrition, so when they need it most, a balanced nutrition is hard to find. With Menu Nature, you give them the balanced and nutritious diet they need.

CLEAN WATER

Clean, fresh water is key for birds: they need it to quench their thirst, to wash up. Regularly giving them water helps to keep them fit and happy.

NURTURE - CARE

We can do so many little things to make small wild birds feel at home, even in the smallest city garden or terrace. A tree or shrubs to give them shelter, birdhouses, feeders and feeding tables make them feel safe and secure around you.
