 Current food				 Versele-Laga Opti Life Prime			

Were you previously feeding another brand and are you now switching to Opti Life Prime for the first time? Great! However, when making the switch, pay close attention to the daily quantity that your dog should eat. You will see that the daily portion will probably be a lot less compared to what you were feeding before. This is perfectly normal, as Opti Life Prime is so rich in healthy proteins and fats and contains fewer carbohydrates, exactly what your dog needs to keep going on adventures day after day. Moreover, it brings a lot of extra benefits.
